Looking for ultra-long membrane durability?

Meet the Kerasep® Diamond II ceramic membrane

The challenges of purification

➔ Purification is a key step of your production processes. Three challenges have to be overcome to optimize your filtration steps.

Improve product quality

Reach target purity levels

Maximize productivity

Optimize membrane flux and permeability

Minimize operational costs

Maximize membrane lifetime

Boost your process performances with the Diamond II membrane

➔ The Diamond II ceramic membrane features high performances that are key to improve your cross-flow filtration process.

Ultra-long lifetime

- Outstanding resistance to abrasion
- 6 year membrane guarantee

Improved process performances

- Designed for backpulse operations to extend production cycles
- Superior flux performance

Benefit from premium services

- On-site technical assistance from Novasep's specialists
- Novasep's membrane expertise
- Technical support for troubleshooting and overall process optimization
